

Dust Reduction Program

Important Rules

Dust control products may NOT be applied to County roads without written approval.

All dust suppression must be completed through the County's Dust Reduction Program.

Dumping oil on County roads without County approval is strictly prohibited.

Standard Application Length

Base application: 100 metres.

Additional length available in 50 metre increments.

This applies to both calcium-based and oil-based dust control products.

Costs & Payment

The applicant is responsible for the full cost of the dust control product. This includes the base application length, any extensions, and specialty equipment if required.

The County provides equipment to mix and apply the product to the road surface. Material costs and application rates are reviewed periodically and may change.

Important Notes

The County does not guarantee the performance or longevity of dust control treatments.

The County may rework or remove dust control applications if road maintenance requires it.

Existing oil-treated sections may be repaired or removed if they deteriorate or create safety concerns.

Operations shall make every effort to notify affected residents one week prior to reworking or removing dust control which is initiated by the County.

DL-10 Requirements

In the case of DL-10 oil dust reduction surfaces, an annual application is required to be eligible for future applications.

How to Apply April 1-30, 2026
